chikara-E/46

Chikara-E/46

Aruji-E/46

Tsuki-E/46-120
Pouffe, 120 cm. width. Seat height 46 cm.

Bench Fune also available in 155 cm. width (Fune-E/46-155)

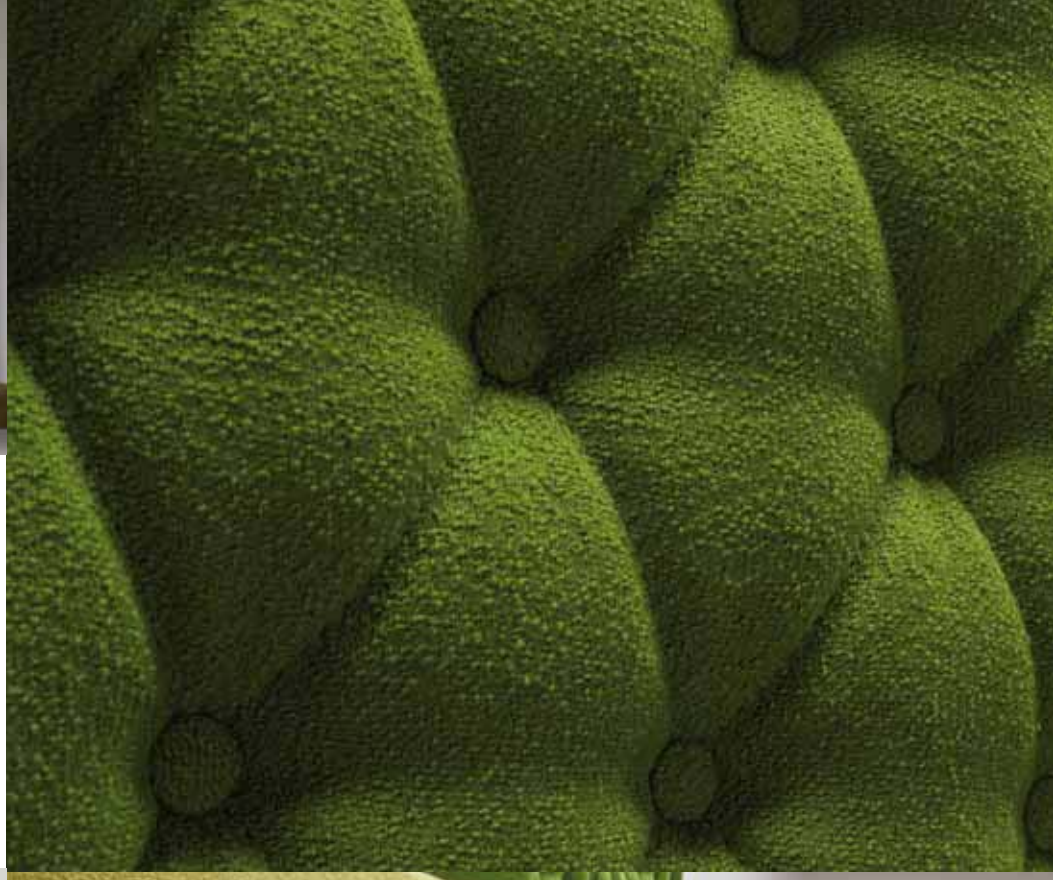
fune-E/46-70

chair: Chikara-E/46 table: KI-E 40x40/71 table-top: Typ-24 inlay Walton 169 greige bench: Fune-E/46-70

babylon-120/46

Modular bench system with a standard width of 120 cm per element, available in different heights from 105 cm.

The standard heights are: 105, 155, 175 and 215 cm.



The Babylon hanging table is made of solid oak panels and comes with a system to attach it to the wall.

The table is made with a finished back side.

The standard size is 70x60 cm.

babylon-70
hanging table

pyramid-E/71

Table with 1 or 2 columns made of oak veneer with a rerecycled cast iron base of 40x40 cm.

Pyramid-E 40x40/71 tabletop: Typ-500 70x70 cm.

Pyramid-E 40x40/71 (2x) tabletop: Typ-24 240x100 cm. inlay Walton 169 greige

The cast iron base is made of recycled material with an industrial look and is fitted with an adjusting screw.

The oak veneer may be finished in a variety of stain colours.

The typ-24 table top has an oak rim. You can choose either walton, marmoleum, laminate or veneer as an inlay.

The thickness of the table top is 37 mm.

chair: 623-E/46 table: Pyramid-E 40x40/71 tabletop: Typ-500 70x70 cm.

Oak, a characteristic wood, is the basic material for all these models.

The specific and strong grain offers the possibility for various distinguishing finishings.

Like for instance the here shown white wash (a hand finish) and eggshell top coat. As if there was no finish at all.

623-E/46

myra-E/46

table: Pyramid-E 40x40/71 (2x) tabletop: Typ-24 240x100 cm. inlay Walton 169 greige chairs: Milo/46, 323-E/46 and Myra-E/46

milo/46 beechwood

The 100x60 cm table top can be fixed to the system wall with a metall table base.

This table base is finished in such a way as to prevent damage to clothing etc.

The table top is available in oak and laminate. The walls of the Domino system have a size of approx. 117x204 cm. The height of the system wall is approx. 90 cm.

domino-100/46

Bench, table and wall system.

Function: freestanding element to add structure to an open space. Only available in standard sizes.

Additional wall elements may be added to the system on the left, right and back side (to form an "H" structure). Hence the name Domino.

The system has adjusting screws and the bottom is protected against humidity.

The system is freestanding and is not fixed to the floor and makes cleaning under the benches easy.

VG/71

Table base VG table

Our advice would be a minimum of 90 cm. width, so a chair can be placed at the table head.

The maximum standard size for a table with 4 legs is 260 x 100 cm.

The table base may be combined with a variety of table tops from our collection.

This model is only available in large sizes. The legs are made of layers of tulip wood, which has a clearly visible and flamboyant structure which is clearly visible in lighter finishings.

Therefore, we advise a lacquer finish for the legs.

table: VG/71 tabletop: Typ-500 260x100 cm. chairs: 185-E/46, 422-E/46 and 323-E/46

edge banco-E

With a natural curved back, made of carefully selected wood veneers, Edge-Banco adds a special flavour to the Edge concept. (See page 24-27)

bench: Edge Banco-E/46 (3x) chair: 185-E/46 table: Lira-E 40x40/71 tabletop: Typ-500 60x60 cm.

chair: 185-E/46 table: Lira-E 40x40/71 tabletop: Typ-500 60x60 cm.

185-E/46

Multi functional model, available in various seat heights.

seat height 46 cm.

seat height 80 cm.

seat height 62 cm.

422-E/46

stackable

The extra metal connection guarantees a long life for frequently used chairs, and also makes it stackable.

We have designed a handy linking mechanism in which the bracket "disappears" under the seat when the chairs are set up in rows.

Solid wooden table tops can vary in size and execution.

422-E/46

HUTTEN is environmentally friendly

HUTTEN spares where possible non-renewable resources and works mainly with wood, a natural, renewable and CO2 neutral production material. This will never negatively affect the quality of our furniture. In the vision of HUTTEN true sustainability, in addition to carefully using materials, has everything to do with a significant proven durability of furniture in heavy use.

We primarily work with FSC and PEFC certified materials, both in solid wood and chipboard material/construction for banks etc. We focus on minimizing waste in our production with the choice of materials, our planning method and state of the art technology and processing.

We are using only water-based stains, recycle solvents, spray electrostatically, re-use cleaning materials etc..

For our fabric collection we also work with fabrics from recycled materials.

The packaging material we use, is recyclable where possible according to German standard.

Further information will be gladly provided upon request.
