

Kvadrat Soft Cells

Acoustic excellence. Sustainable design.

Where it all began.

kvadrat soft cells

Kvadrat Soft Cells

Kvadrat Soft Cells are patented panels that control sound absorption.

Suitable as building components or for post-fitting, Soft Cells allow you to create an aesthetic environment with excellent acoustic properties that promote productivity and well-being.

A versatile building component

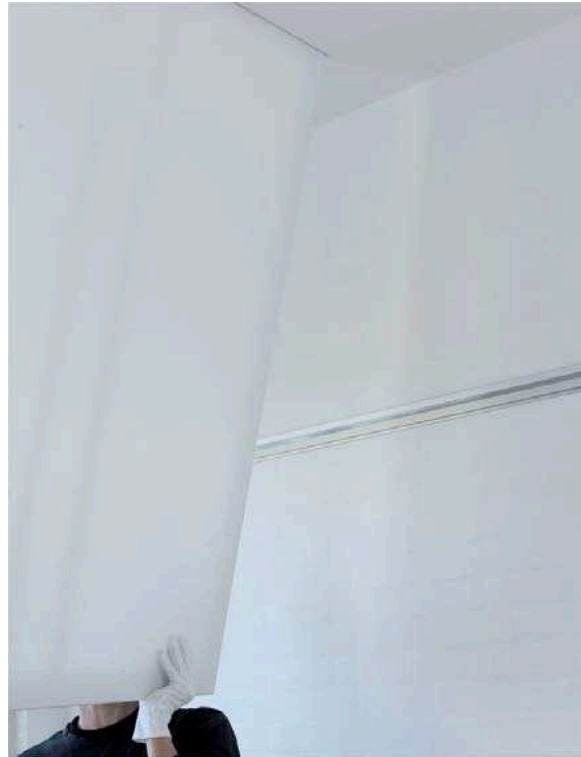

Bespoke sizes

Post fit possibilities

Soft Cells produced off site

Quality control of product delivered to site

Adaptable to meet structural constraints

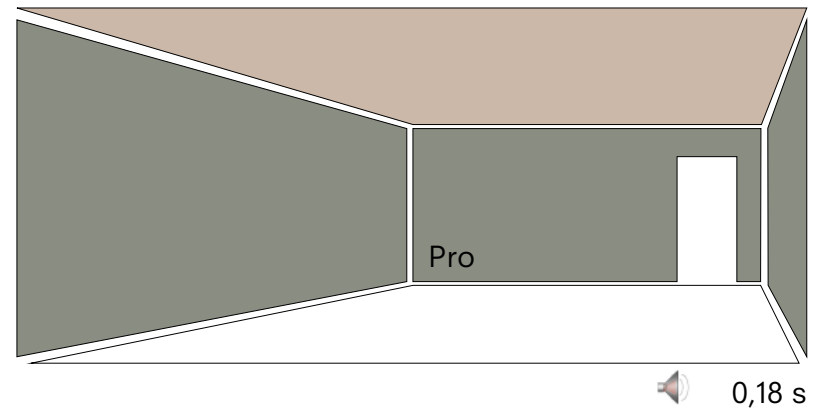

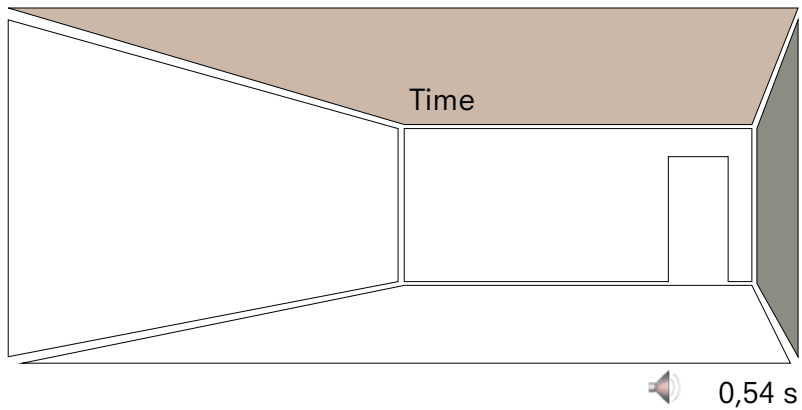

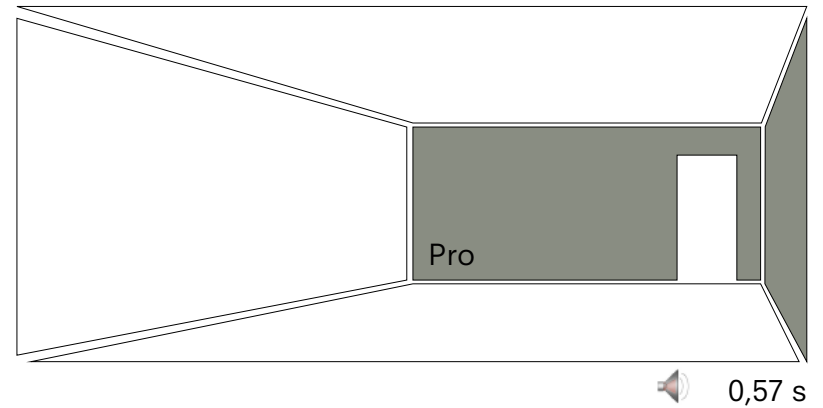

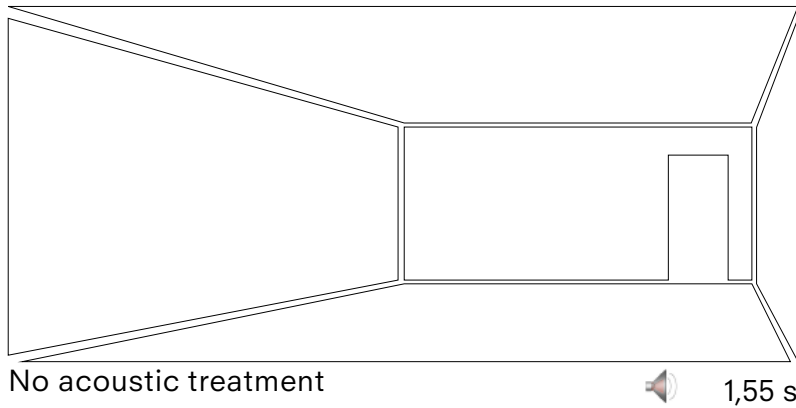

kvadrat soft cells

For an optimised environment

It has been scientifically proven that physical and psychological strain may result in approximately 25-30% performance loss among office workers.

The technical specification of Soft Cells has been designed for acoustic comfort by broadband conditioning in all relevant octaves between 200-4000 Hz. The aim is to lower the intelligibility of words and sentences in working environments.

A more productive environment

Innovative, sustainable design

“Kvadrat Soft Cells represent the ideal symbiosis of design and technical parameters. Planners discover completely new aspects of acoustic room conditioning.”

Acoustician Dipl.-Ing. Architect Jens-Michael Baum

“It is great when you find products like Soft Cells that solve problems, are flexible in use, easy to install, look good and have excellent technical support.”

John Small
