FROM THE DESIGNER

MILK

By Holmris

Design: Søren Kjær

In a world where thousands of new products are born everyday, you really have to be able to offer something special. For the last 15 years, I have followed the design scene closely. Still, at the end of the day, my primary measurement has always been the same. It's a simple question: Do I want this? I designed MILK for myself, not for anyone else. For me, it's always personal. I needed a desk that was simple but never boring. Smart but not overly sophisticated. I wanted a desk worth falling for, so I created MILK and to be honest, a year later, I'm still completely in love with it. Luckily, so are many fine friends all over the world, who like me appreciate a sleek aesthetic, smart function and good quality. In the future, I'll continue to use my intuition and passion to create more great designs for myself, that I hope you will enjoy as much as I do.

BLACK MILK

Some like the Beatles,
others the Stones.

That's why we created BLACK MILK. It's completely black, down to the bolts. Just plug in the black power cord and you're ready to rock.

A DESK WORTH FALLING FOR

ASK FOR A RAISE

Lift your desk with
the touch of a button

Then lower it whenever you like. No need to adjust knobs or bolts, our base adjusts electronically so you can sit or stand comfortably.

START A THINK TANK

Yes, we love the fish too

But did you know it's also good for you?
A few minutes spent staring into your desktop tank
reduces stress for a meditative retreat that's guru-free.

PUT IT IN WRITING

Where do pens go? We don't know. So, we created a Penholder to put writing utensils right within reach. Go ahead, add scissors and a letter opener, the pens don't mind.

CLEAN UP YOUR DESKTOP

Garbage has never looked so good. This Bin is a neat freak's dream. Conveniently set right in the desk, it's designed to help you stay clutter-free, physically and mentally.

FILE IT UNDER SMART

Put your paperwork right at your fingertips.

HOOK UP THE CABLE
Plug in without getting
tangled up

Our cable Exits make power cords, firewires, and broadband cables happy by bundling them together tight, and placing them out of sight.

We like to work

so we made a desk

that likes to work too

4MILK

we like sharing

Why should everyone sit at their own desk when we can all work together?.

With 4MILK you and three of your colleagues can take it straight to the top while you sit side by side

More MILK...

so we made a desk
