Respecting the environment

Using environmentally friendly materials and processes in the production of their products is of the utmost importance to Stokke. It's also their aim to produce products that last a long time.

Materials

The wood used by Stokke is cultivated and generally beech. Products may be delivered with untreated wooden parts, but usually come varnished, wood stained, oiled or waxed.

Fabrics and leathers

Stokke offer a selection of high quality fabrics in a variety of colours. The fabric collection consists of natural materials such as wool and cotton. The high quality leather also comes in a variety of different colours.

Warranty

A 7-year warranty is offered on all wooden components.

WE ARE CREATED FOR MOVEMENT NOT FOR SITTING

Most of us during the course of a day are caught up in an impassive marathon – moving from one seat to another. We need to be able to move around freely and sitting for long periods of time puts a tremendous strain on the body.

Stokke offers a unique collection of sitting solutions that guarantee movement and variation for the user.

Intelligent sitting solutions

Stokke's products are daring, different and unconventional! They ensure you'll be able to move freely even when you are sitting for long periods of time.

MOVE™ by Stokke

Freedom of movement is important to us all and Move could be the most movable experience you'll ever have!

Freedom for movement and less strain on the back gives freedom to concentrate on work.

The saddle-shaped seat (360°) makes it easy to move around while working in standing as well as sitting positions. The disc base is graded, giving Move a tilting angle to follow your body's changing positions.

The disc base is equipped with a rubber surface to ensure friction and to protect the floor.

Optimal at all kinds of activities that can be done in half standing, half sitting positions – e.g.:

- standing support for the hairdressers, receptionists etc.
- ironing
- at the drawing table
- in the kitchen

The height of Move can be adjusted adding to the versatility of this sitting solution.

It is also possible to get Move with different sizes both of base and seat.

Move small

Height: 49-66 cm. Adjusted to suit the weight of children making it easy for them to regulate. Move small is delivered with a rubber sole as a standard.

A rubber stopper under the seat makes it easy to hang on table/desk to clean the floor.

Move comes in different heights:
N: 49-68 cm
H: 56-82 cm
EH: 65-87 cm

The disc base can be equipped with a rubber sole to give an even better grip on slippery surfaces.

INvariably, GOOD SOLUTIONS ARE SIMPLE. MOVE ITSELF IS SO SIMPLE – IT'S PURE INGENUITY
