ACOUSTIC LAMP

Lighten your own **PRIVACY**

A felty sunshine drives out the darkness and the evil world.
No distracting elements get through.
Only the cocoon of light remains and catches the eye.
A centrepiece ready to be admired.

Light and sound are at their best when you do not notice them. Felt + lamp = a felt lamp = what you see is what you hear. A brand new way to experience your surroundings. It's light to the eyes and rest to the ears

We at SOFTEN do our best to help inspiration rule our lives.
At home or at work.

When the eye, mind and soul in perfect harmony
- things just can't go wrong.
