 GÖTESSONS

HEALTHY EMPLOYEES. BETTER RESULTS.

Over the past 15 years, a major focus has been placed on improving lighting and acoustics in offices, while air quality has been neglected and gradually deteriorated - even in new buildings and offices. We must do something about this!

LET US INTRODUCE GOTESSONS "PAZ"

Pure Air Zone®, also called PAZ, is a sound absorbing tabletop screen that creates a "Zone" with local air purification at work by continuously providing fine filtered clean air through the front of the screen mute and energy efficient. PAZ combines sound absorption and air filtration in a patented design and is produced to improve air quality and noise levels at the workplace in an office resulting in a more efficient working environment and better health. Indoor air has for some time been generally deteriorating for reasons such as air pollution, limited ventilation as a result of energy savings and increasing numbers of new chemicals and substances in the air. At the same time several major scientific studies show that people become both healthier and more productive - as much as up to 13% - of working in clean air. Other scientific studies indicate a reduced absentee leave from work of up to 30% by working in clean, purified air. All scientific studies mentioned can be found on our web site www.gotessons.com.

Today's technology for air purification is mainly either filtered in conjunction with the ventilation of the room or with a portable air cleaner. The problem is that these techniques only offer a limited purification of the air as usually there is simultaneously a demand for low noise level and avoid draft. PAZ working locally, completely silent, does not create any unwanted drafts and requires minimal maintenance.

HOW DOES IT WORK?

Pure Air Zone® has a fan located under the table top that draws in contaminated air and passes it through a prefilter and then a fine filter. The purified air is then transported up inside the fabric-covered table screen and then through a flow-equalizing construction that blows the air through the fabric on the screen front with very low speed.

A workplace equipped with Pure Air Zone® becomes a zone of pure air. Laboratory measurements show that PAZ reduces the amount of hazardous particles in the breathing zone - such as pollen, dust mites, and various Allergens - by about 80%. An additional benefit is that it improves the general air quality. So the more work stations in offices that are equipped with PAZ, the higher removal efficiency and better general air. As the entire unit is built into the screen it does not take up space from other furniture, concealed in a discreet with a integrated cable collector.

“AIR QUALITY NEGLECT AND PARTICLES IN THE AIR KEEP INCREASING. WE SPEND UP TO 90% OF OUR TIME INDOORS, AND IT IS NOT DIFFICULT TO REALIZE THAT WE MUST DO SOMETHING ABOUT THIS PROBLEM!”

Tomas Svensson,
Product Manager at Götesson

”LAB TESTS SHOW THAT PAZ IS SUPERIOR IN CREATING CLEAN AIR AT THE PLACE WHERE YOU ACTUALLY SIT AND WORK.”

Mats Rydsund, PAZ-concept innovator

WE SPEND UP TO 90% OF OUR TIME INDOORS. CLEAN AIR IS A RIGHT!

PAZ REDUCES PARTICLE CONTENT IN THE BREATHING ZONE IN FRONT OF THE SCREEN BY 80-100%.

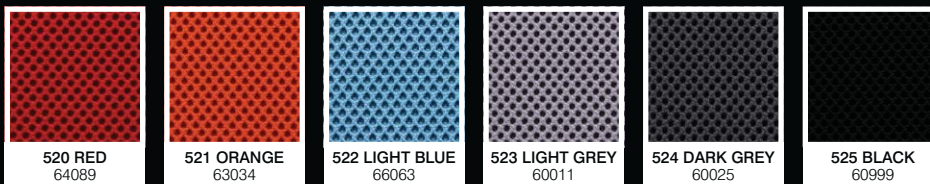

INDOOR AIR CAN BE UP TO 50 TIMES MORE POLLUTED THAN OUTDOOR AIR.

HARLEQUIN

RUNNER

PAZ SCREEN

ART.NR.	SIZE
105120	B. 1200 H. 675
105140	B. 1400 H. 675
105160	B. 1600 H. 675
105180	B. 1800 H. 675

DESK MOUNT

ART.NR.
641020-1 WHITE
641020-2 BLACK
641020-3 SILVER

ORDER PROCEDURE

Select screen size and screen colour. Specify the article number as follows: Desk screen size - fabric colour. Example:

105160- 522. (1600 mm desk screen with Runner Light Blue)

Don't forget to order desk mount.

REPLACEMENT FILTER

ART.NR.
105119
