

HÅG Tion

one chair to work from anywhere

HÅG Tion

one chair to work from anywhere

HÅG Tion is a chair for the modern world. Flexible and sustainable, it is a chair designed to fit just about anywhere, from the new breed of home workspaces to dynamic office environments.

The most sustainable task chair in the world?

With the HÅG Tion we continue to push the boundaries of environmentally conscious furniture.

Made with 71-75% recycled materials, designed for disassembly, and made using as few components as possible, it also has the lowest carbon footprint of any of our task chairs, and can be repaired and refurbished long after its 10-year warranty.

All of this combined make it our most sustainable task chair to date.

Turning waste in to beautiful chairs

- 94% post-consumer recycled plastic in seat and back shell
- 97-98% recycled aluminum parts
- Responsibly sourced woods
- Many sustainable fabrics options

HÅG inBalance® promotes health and productivity

HÅG Tion is a chair with flexibility at its core. Our trademark HÅG inBalance® movement mechanism intuitively promotes subtle movements and posture variations throughout your workday.

The perfect chair for you

With HÅG Tion, you have the freedom to create the perfect chair for you.

You can choose from a combination of wood, metal, plastic and upholstery options in a wide range of stylish colours and finishes to suit any environment, be it in the office, the home or anywhere you need to work from.
