

Q20 • SIT STAND DESK

The history of Holmrís

In 1937 cabinetmaker Søren Holmrís began producing household furniture for the Danish market. The 2nd generation - Erik Holmrís - went one step further and trained at the Design School in Copenhagen, where most of the great contemporary furniture designers also studied. Throughout the '60s, '70s and '80s Holmrís experienced rapidly growing export sales - mainly to the North American market.

Henrik Holmrís, 3rd generation took over in 1993 and began to change the company's course towards the office furniture market.

In 2000 Holmrís Office was founded, which today is the core of the entire Holmrís Group.

In the years 2011-2013 our Danish sales company Holmrís+Flexform was formed, and in 2013 we opened our US sales company, Holmrís US Inc.

The latest part of the Holmrís group's expansion has been the acquisition of Labofa which is considered among the best known furniture companies in Denmark. Labofa is known for its office chair production and has also reached a position as strong and innovative supplier to the educational sector.

Holmrís has over 20 years of experience in the production of work stations. With one of the largest and most unique collections of height adjustable desks Holmrís is one of the dominant manufacturers in the Scandinavian market.

In the office storage segment Holmrís is also considered a market leader offering solutions with new functions and features.

With the combination of soft seating, meeting tables, school furniture, office furniture and office seating from the group's three brands the Holmrís Group offers complete solutions for both offices and learning.

Environment & human responsibility

Holmrís office furniture is produced at the factory in Bjerringbro according to the ISO 14001 standard. Reducing the impact on the environment to an absolute minimum is one of our natural focus areas. When designing new products the future environmental impact is considered at an early stage. This ensures that the combination of raw material, production method and applied technology results in products with a minimal environmental impact.

As a member of the worldwide CSR program Holmrís focuses on decent working conditions for employees of our suppliers. To us it would not make sense to contribute to an improved working environment for our end users, if parts for our furniture were manufactured under unacceptable conditions.

Q20 Sit Stand

Q20

Columns (rectangular) and feet in black, white and alu.

Flexible black topframe. Adjustable from 110 cm - 168 cm

Height adjustment range:
61 - 126 cm and 70 - 120 cm

Max weight load: 130 kg

EMPLOYEES SPEND MORE AND MORE TIME IN THE OFFICE

As work practices change and an increasing number of today's employees spend more and more time in the office, the makers of office desks face new challenges and opportunities. This puts focus on actuator systems for office desks. Not just as an occasional option, but as a standard feature to provide the flexibility required by modern dynamic work styles.

WE IMPROVE YOUR LIFE

CHOOSE LINAK FOR...

For more than a decade, LINAK has supplied dedicated systems to office furniture manufacturers. Choose LINAK actuator for innovative design and the widest product programme on the market.

Certifications

We use certified management systems to continually improve our quality, environment, health and safety.

Q20 Frames

ZERO technology

The environment is increasingly on people's minds. We use ZERO technology to lower standby power consumption to just 0.1w. All our DESKLINE control boxes have low standby power as standard. Look for the ZERO icon to denote products that have low standby power consumption.

5 years warranty

Holmris warrants to the original purchaser that the products it manufactures are free from defects in design, material and workmanship. With prompt written notice, Holmris will replace, any product, part or component which fails under normal use as a result of such defect.

The following exceptions to the limited lifetime warranty do apply:

- Electric components and motors are limited to 5 years, under normal operational conditions, subject to the inspection and determination of the manufacturer.

This warranty does not apply to:

- Damage in shipment caused by a carrier
- Defects caused by improper installation
- COM or third party materials applied to the products
- Customer modifications to the product
- Products subject to improper use and conditions
