Nature

NOIR is one of those leathers that stirs the emotions even before you touch it. Come closer and you can see the lovely, natural irregular marking from the rawhide. Run your fingers across the surface and feel the smooth texture of the natural grain. As a Semi-Aniline leather, NOIR has a special light finish that protects it from dirt, the effects of light and the harmful rays of the sun. The surface has a slightly more uniform look than Aniline leather, but the natural grain is still visible, adding to its authenticity and originality. NOIR is soft, flexible and comfortable, making it an exceptional choice for furniture.

Type
Semi-aniline leather

Anthrazite

Run your fingers along the surface of DUNES® and it feels as smooth as butter. The treatment process involving sanding, buffing and application of a custom oil to the surface gives it a velvety touch with a sublime tactile feel. DUNES® boasts a matt look that's raw and natural featuring subtle, natural markings which makes each hide unique. The colors will vary from hide to hide. As a result of the leather's exposure to daylight, interior lighting and usage, a patina will develop, and the surface will become smoother and shinier over time.
