Sales Tools

- Designed by an ergonomist and practicing physiotherapist
- Patented design
- The world’s first instantly-switchable left/right-handed mouse
- Very compact – ideal for laptop users
- Ideal home mouse – for use by adults and children, left- and right-handed
- Intuitive action – many users can use it almost instantly with their other hand
- Users naturally release the mouse when not using it – many people continue to hold a standard mouse even when not using it (placing unnecessary stress on the hand and wrist)
- Uses the “precision grip” where many ergonomic mice use the “power grip”
- “Grab it like a grape” explains the hand posture – the same way you would pluck a grape from a bunch
