## benchwall

Made from paper or textile, benchwall is a flexible bench with a tall backrest that functions as an acoustic space partition as well as seating. Adaptable in length and placement, benchwall can stretch into straight, high-backed benches or sweep into a circular bench lined room for intimate meetings.

Design by Stephanie Forsythe + Todd MacAllen

elements are flexible in length. The maximum length when fully expanded is 3.5m (11.5') with the exception of white textile benchwall which comes in two standard lengths, 2.5m (8') and 5m (16').

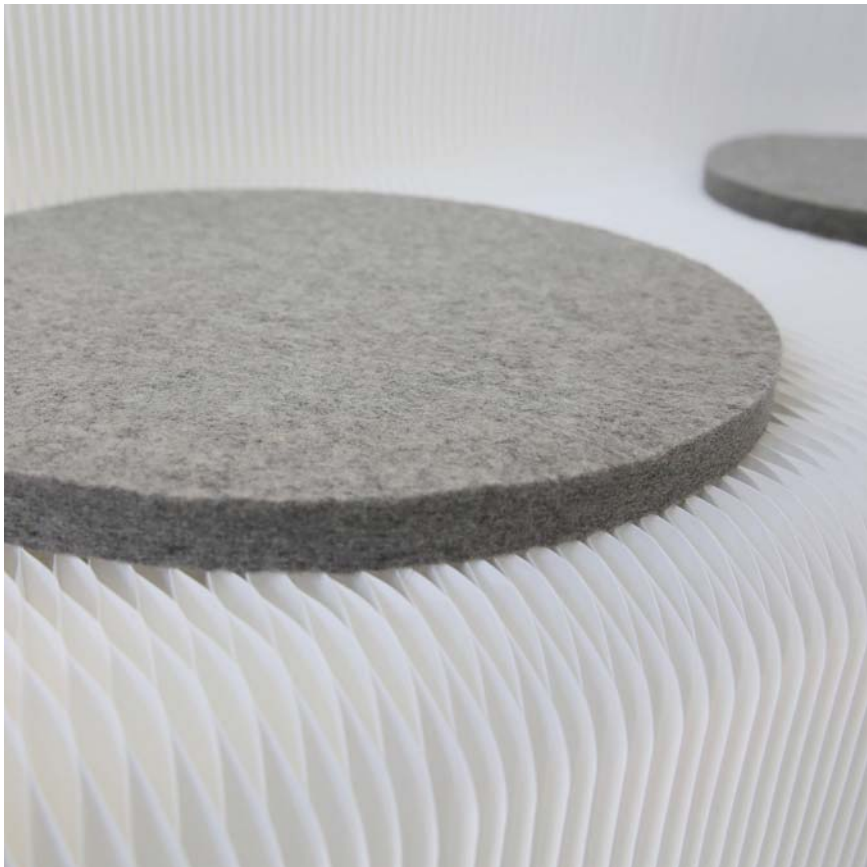

12 - 14 weeks lead time for custom height

benchwalls connect to one another by magnetic end panels, or to softseating benches to create unique meeting rooms or amphitheater-style seating.

made from natural lamb's wool, the 15" (380mm) diameter felt pad is a perfect cushion for benchwall.

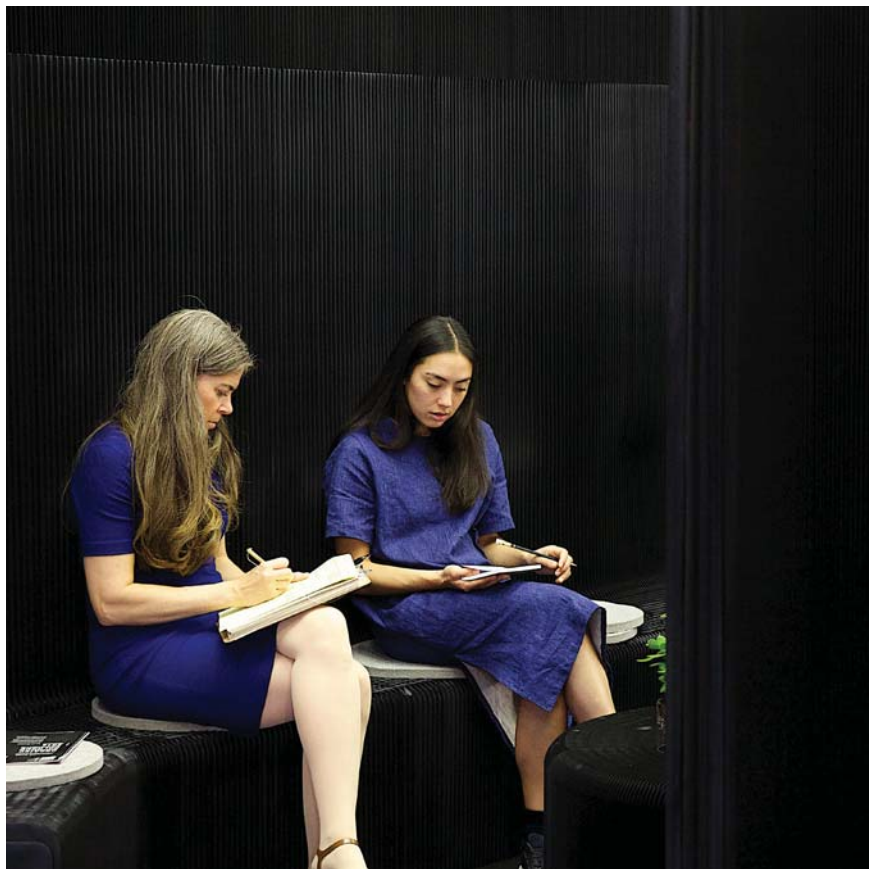

with time and use, the top surface softens and folds into a unique, organic pattern. The crushed facets catch light in a beautiful, variegated way, while the honeycomb below remains strong and intact.
