

# PILE TABLE

enea

BY Estudi Manel Molina

The Pile range of folding tables have been designed with high functionality in mind. Pile tables' clean, simple lines make them solid but striking. They feature a specially designed mechanism allowing the top to be quickly and easily folded for storage, without compromising on stability. Lightweight and robust, Pile perfectly meets the needs of busy and adaptable environments, both indoor and out. Available in 72 and 110 cm heights and 60, 70 and 80 cm table tops.
