As the leading UK specialist screen manufacturer we can offer office screen solutions for any specification. We are continually developing new revolutionary screen systems for the marketplace of today and tomorrow.

Contained within this product guide is our range of existing screens, 1 / 2 / 3 / 5 Series / Fusion and Curvex with the addition of our latest innovation Origin.

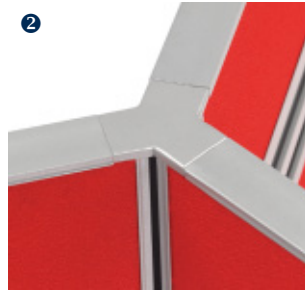

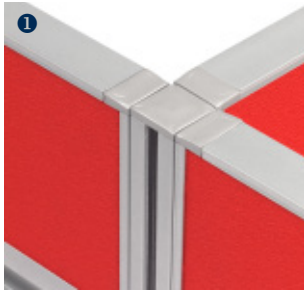

We continue to invest heavily in design and development and are actively looking to improve our already comprehensive suite of products, to meet the ever changing needs of our marketplace.

FUSION

- ❶ By using the Fusion junction post, screens can be linked in 2, 3 or 4 way configurations
- ❷ Fusion screens can be linked at 120°
- ❸ The multi-functional end trim can be snapped into the junction post as an aesthetic alternative as shown
- ❹ Slatwall screens can provide vast areas for a range of clip-on accessories

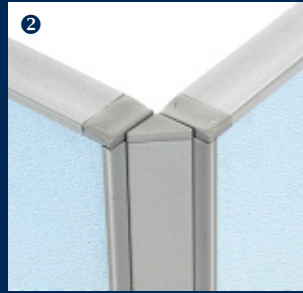

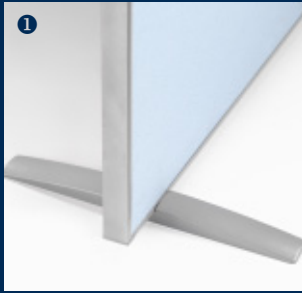

- Fusion is a slimline 30mm screen which utilises a full aluminium picture frame providing enhanced protection and aesthetics
- Fusion's frame is complemented by colour matched end trims and caps which are supplied as standard with each screen
- All frames, end trims, caps, brackets and feet are offered as standard in three contrasting colours - silver, graphite and mist
- Multiple finishes are available for Fusion screens ranging from fabric and vinyl to glazing, laminates and perforated steel mesh

- ❶ Fusion's unique sliding T foot allows you the flexibility to avoid unforeseen obstacles
- ❷ The Fusion end trim is multi-functional and is also used to finish a 90° join as shown
- ❸ Mixed finishes are available. Perforated steel mesh and glazing are shown
- ❹ Fusion screens can accommodate toolrails in singles or multiples and can be positioned anywhere up or down the screen

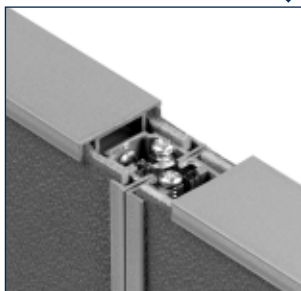

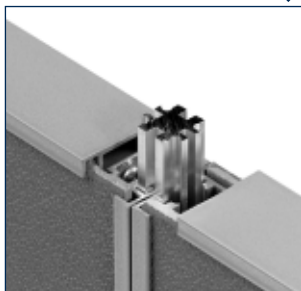

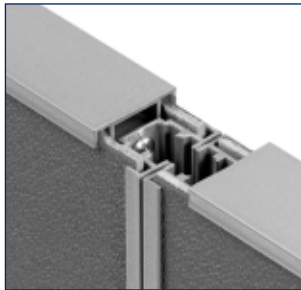

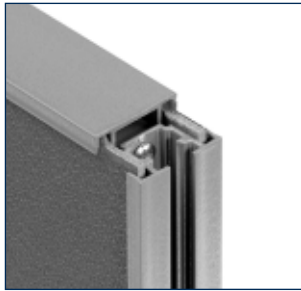

- The Fusion screen has a simple, unique, rigid metal linking system which is supplied with each screen as standard and is not visible
- Fusion's discreet linking system, which is hidden inside the screen enables quick and easy installation
- Fusion is available in various screen types including free standing, desk-up, flypast and curved along with two top styles which are straight and wave
- Fusion screens are constructed using our durable lightweight internal panel
- Desk-up screens are supplied with our unique desk mount brackets which slide along the screen to avoid obstacles and include a pressure pad fixing

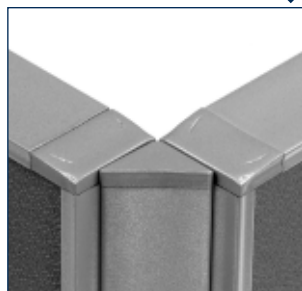

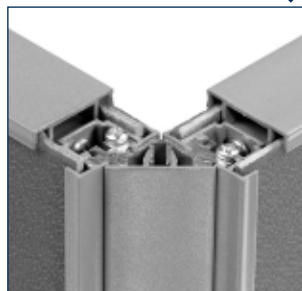

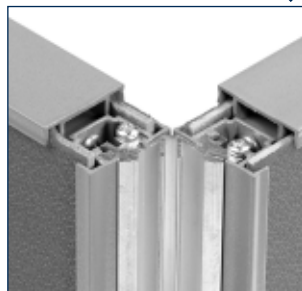

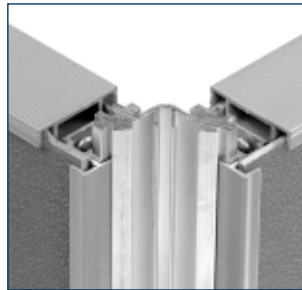

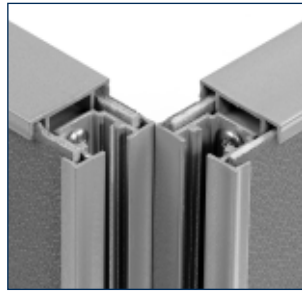

INLINE LINKING

By using the Inline link pieces supplied with each screen Fusion can be linked together with no inline growth created

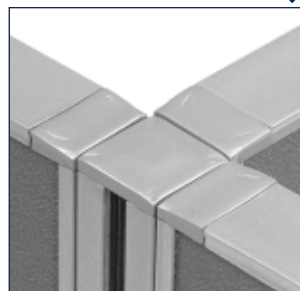

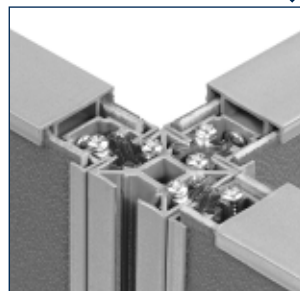

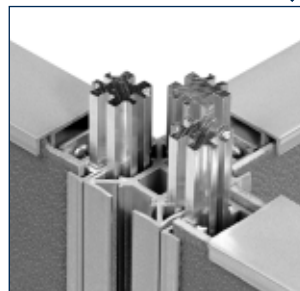

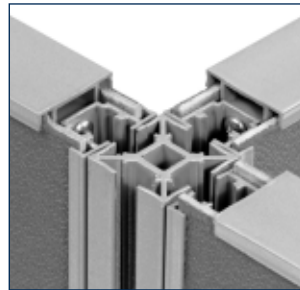

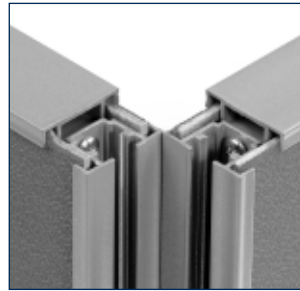

90° LINKING

By using the 90° links supplied with each screen Fusion can be linked together and finished by using the end trim and 90° cap (all supplied as standard with each screen)

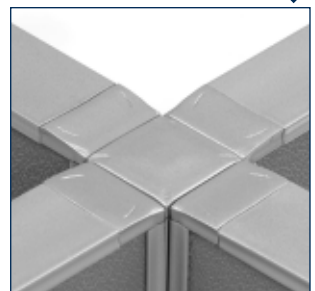

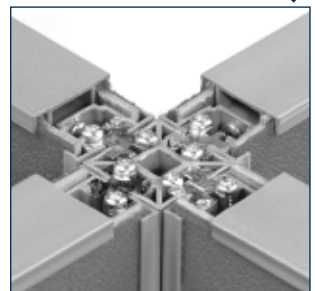

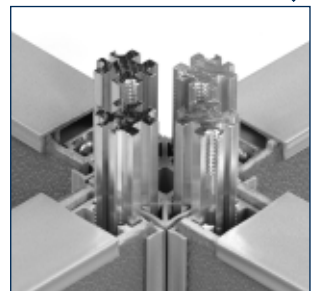

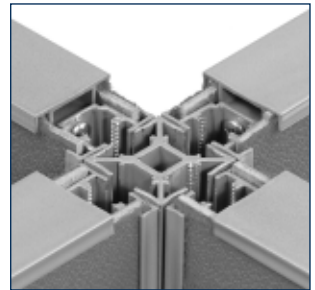

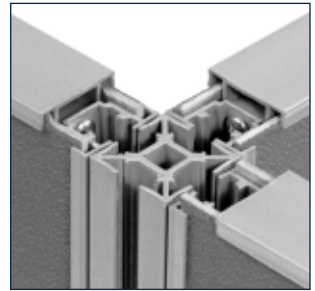

3 WAY LINKING

Fusion junction posts can be linked to the screens using the Inline links supplied. The post is finished with colour matched caps

4 WAY LINKING

Fusion junction posts can be linked to the screens using the Inline links supplied. The post is finished with colour matched caps

ORIGIN

- ❶ Origin's unique sliding T foot allows you the flexibility to avoid unforeseen obstacles
- ❷ As an aesthetic alternative Origin's sliding disc foot can be used
- ❸ The colour matched end trim and caps help to achieve colour co-ordination. Graphite frame finish shown
- ❹ By combining desk-up, flypast and free standing screens offices can be tailored to individual designs

- Origin is a slimline 30mm screen which utilises a full aluminium picture frame providing contemporary aesthetics and edge protection
- The frame is complemented by colour matched end trims and capping available in silver or graphite which are supplied as standard with each screen
- Origin screens are available in a variety of screen types including free standing, desk-up, flypast and curved along with two top styles which are straight and wave
- Origin screens have an integral toolrail which allows accessories to be fitted without the need to specify any extra components

❹

ORIGIN

1 The Inline link doubles as an end trim and finishes flush with the screen edge creating a neat aesthetic

2 Origin screens can be linked inline using a combination of the Inline and 90° links

3 3/4 way linking is achieved by using a 3/4 way linking strip as shown

4 Due to the picture frame design mixed finishes can be used to create personal spaces

- Multiple finishes are available for Origin screens ranging from fabric and vinyl to glazing, laminates and perforated steel mesh
- Desk-up screens are supplied with our unique desk mount brackets which slide along the screen to avoid obstacles and include a pressure pad fixing
- Each Origin screen is supplied with an Inline and 90° link as standard which are supplied in silver or graphite to match the frame finish
- Origin's simple linking system enables quick and easy installation

CURVEX

2

1 Curvex screens are so flexible they can be twisted into many different shapes

2 Curvex screens are available in set sizes and can be straight or waved dependant on your requirements. Maple finish shown

3 The Curvex screen upright is finished with a colour matched top cap

4 The stylish Curvex foot can provide additional stability if needed and will be colour matched to the upright

- Designed to enhance reception areas and provide break-out solutions
- Timber construction with flexible joints allowing freedom of movement
- Available with an aluminium upright which can be finished in silver or graphite
- Curvex can be supplied in finishes such as maple, cherry, beech, ash, oak and silver
- By utilising the standard Era linking system Curvex can not only be linked to each other but also linked into other Era screen ranges including Origin

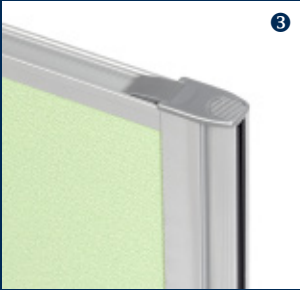

3 SERIES

❶ The 3 Series range has two foot options available which are T feet and disc feet (as shown). Both of these feet are available as static or sliding providing complete flexibility

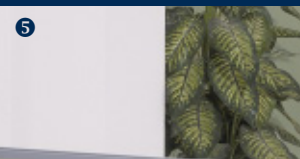

❷ The 3 Series range has an integral toolrail which allows many different accessories to be clipped into it. Hangover shelf shown

❸ The 3 Series range encompasses captive sliding top caps which house access to the end trim and linking system. Silver trim and top cap shown

❹ By specifying a 3 Series junction post, which would be colour matched to the frame, the aesthetic of a 3 way linking configuration can be enhanced. Graphite top caps shown

❺ By mixing desk-up screens with free standing you can achieve many different solutions to screening situations

- The 3 Series utilises a full aluminium frame allowing flexible specification and finishes
- The frame finish is silver or graphite as standard but can be coated in any RAL or BS colour required
- The 3 Series has innovative features such as captive sliding top caps and multi-functional links which double as end trims
- Each 3 Series is supplied with an Inline link and a 90° link as standard
- The 3 Series is available as free standing, desk-up, goalpost and goalpost electric and can be specified with both straight and wave tops

5 SERIES

- ❶ 5 Series has the thickness and flexibility to specify socketry in a back-to-back configuration as shown
- ❷ High level offices can be created to provide division within an open plan office but can always be demounted and reconfigured
- ❸ 5 Series electric screens can provide electric socketry in many different ways
- ❹ Full glass screens can be used to create quiet areas which still allow freedom of sight
- ❺ By using internal blinds office pods can be turned into private areas

- The 5 Series range is designed to provide total screen solutions for electrics and high level offices
- Utilising a full aluminium frame and our durable lightweight internal panel 5 Series is not only protected but lightweight too
- 5 Series uses its increased thickness to provide integral cable management solutions
- Feed through cable management and cable dump facilities can be used individually or in tandem
- When high level office capability is required 5 Series can be offered as a advantageous alternative to partitioning
- Features such as wall fixes, doors, vision panels and internal blinds can be used to tailor segregated areas for you

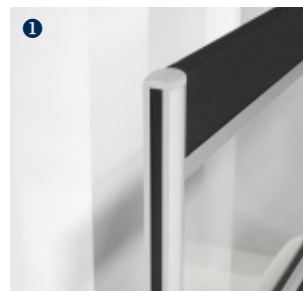

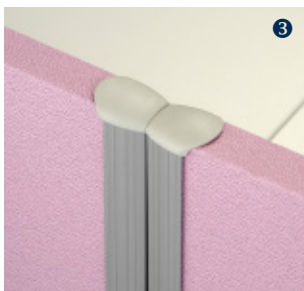

2 SERIES

- ❶ 2 Series is available in a glazed finish in a variety of sizes
- ❷ Both T feet and disc feet (as shown) are available for 2 Series free standing screens to increase stability
- ❸ By using the standard Era linking system 2 Series linked together has no inline growth

- 2 Series is our economy screen range
- Utilising the standard Era linking system 2 Series will link to 1/3/5 Series, Curvex and Origin (see page 28)
- Screens have aluminium uprights which provide strength and are available in silver or graphite as standard but can be finished in any RAL or BS colour
- Both free standing and desk-up screens are available and both fabric and glazing are offered as standard panel finishes
- The screen can be styled in either straight, wave or arc tops dependant on your requirements

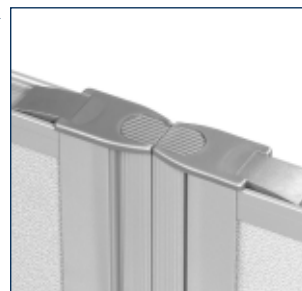

- ❶ The 1 Series upright is finished with a slim cover strip on end of runs
- ❷ Each screen is supplied with an Inline link as standard
- ❸ By using the standard Era linking system, 1 Series, when linked inline provides an upright to upright finish

I SERIES

- 1 Series is the entry-level product which can be used to provide concise screen solutions when an economic option is essential
- 1 Series utilises our durable lightweight internal and standard linking system
- 1 Series can be used to create both free standing and desk-up configurations
- The 1 Series encompasses a rigid UPVC upright which is available in two colours, graphite as standard and silver on request
- 1 Series is available in three screen top styles which are straight, wave and arc

INLINE LINKING

By using the Inline link piece supplied each screen can be linked together with no inline growth created

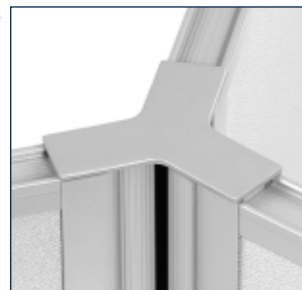

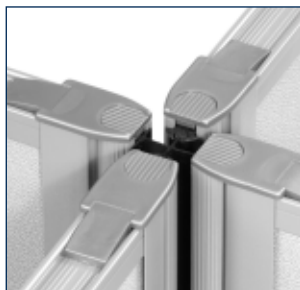

90° LINKING

By using the combination of both Inline and 90° links screens can be linked together at 90°

OTHER LINKING

By using different combinations of links you can create 3 way and 4 way joins and link at 120° using a metal plate

SCREEN ACCESSORIES

We offer a varied range of accessories for our screens.

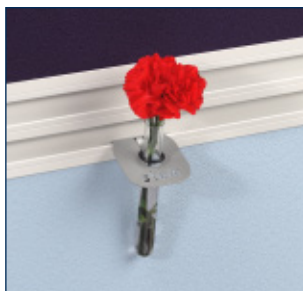

These can be used with toolrails on Fusion, Origin, 3 Series and 5 Series

These can also be used with top rails on Origin, 3 Series and 5 Series (except monitor arm)

Shown on the top row left to right are A4 landscape tray, book shelf and lateral file holder

Shown on the middle row left to right are pen pot, CD holder and stationery tray

Shown on the bottom row left to right are flower holder, magnetic board and monitor arm
