.3Dee
Active Office Chair

Not simply ergonomic. But threefold dynamic.

.3Dee
Active Office Chair

Office chairs are numerous. But which one gives us back the natural freedom of movement we have lost through years of daily office life? **3Dee**, the new ergonomic 3D office chair. Built with the knowledge that passive sitting in a rigid posture makes you ill in the long run, impairs concentration and performance and greatly reduces your quality of life. But what makes the **3Dee** so different from other office chairs? Quite simple. The **3Dee** is designed without compromise around the natural biomechanical model of the human being.

This design includes 180 components we have specially developed and six patents. For example, the **patented swopper technology**®. Because it supports and encourages movement sideways, backwards and forwards and up and down. Add to this the comfortable, half-height backrest with individually adjustable lumbar support – ideal for conscious relaxation now and again. The fact that the **3Dee** also cuts an extraordinarily fine figure will please particularly all those for whom the office is not just a workplace, but also a creative living space.

The most innovative office chair in the world.

Activated: Because the **3Dee** follows the movements of its sitter, so your back keeps straight. In addition, frequent change of posture strengthens your back and keeps your muscles fit.

Motivated: The **patented swopper technology**® **1** encourages and supports harmonious 3D movement. This stimulates your circulation, puts you in a good mood and boosts your performance.

Relaxed: The backrest with **patented lamellar technology** **2** and **physiologically shaped backrest cushioning** **3** provides support without restricting freedom of movement. The **lumbar support** **4** and **backrest tension** can be individually adjusted.

Unrestricted: The intelligent seat is slightly convex, upholstered with breathable **multi-zone integral foam** **5** and equipped with the **flexzone**® **technology** **6**. For a healthy seat climate and optimum sitting comfort without any pressure points.

Perfect fit: backrest tension & seat height

Adjustable: movement sideways & up and down

Moving. In every detail.

There is always room for innovation where demands are high.

Time for a change.

The **3Dee** is the result of absolute consistency. In engineering and design. It not only promises sustained change in daily office life, it already embodies this vision. More wellbeing, more energy, more balance in general for the sitter. And on top a striking design that skillfully fits in with all styles of modern office design. You can't expect more of an office chair. But it doesn't have to be less in the future either. Go for three dimensions. And no compromises.

3Dee, Aluminium black

3Dee, Aluminium polished

Technical Data.

Seat width:	46 cm / 18.1"
Seat depth:	41 - 46 cm / 16.1" - 18.1"
Seat height:	BASIC spring model: Height adjustment range 42 - 56 cm / 16.5" - 22" loaded* COMFORTPLUS spring model: Height adjustment range 45 - 59 cm / 17.7" - 23.2" loaded*
Seat cover materials:	Gabriel Step/Step Melange: 100% Trevira CS, hard wearing, colour fast to light, flame retardant, certified in compliance with Oeko-Tex 100 PREMIUM-Leather: high-quality semi-aniline leather with natural grain (black)
Seat cover colours:	grey-melange, aqua, caramel, coral, black
Weight:	20 kg / 44 lbs
Load:	60 - 120 kg / 132 - 265 lbs
Backrest:	43 cm / 16.9" height
Base:	75 cm / 29.5" diameter
Safety gas spring:	140 mm / 5.5" height interval

*Seat height measured with a standard load of 65 kg/143 lbs

Our success lies in movement.

If you observe children, you will see that there is hardly a moment when they keep still. Movement is in the very nature of the human being. It is the long periods of sitting and standing - in school, at work and in the car - that put the body into a straightjacket of motionlessness, which we finally pay at a very high price: our health.

Therefore, since 1997, aeris has devoted itself to revolutionising standing and sitting at the workplace. Our philosophy is as simple as it is effective: more movement! In three dimensions. We call that 3D ergonomics. For our customers this simply means better health, more motivation and higher productivity. And success proves us right. Our products - be they the **swopper** active seat, the **muvman** variable standing/sitting seat or the new **3Dee** office chair - set new benchmarks and have catapulted aeris into the top 100 of the most innovative small and medium-sized German businesses.

Together we can get things moving!

Life in Motion
