A responsible approach to defining office space

## recycled

Lucia 'second nature' fabric is made from 100% recycled raw materials, consisting of post-industrial waste polyester created during the manufacture of polyester yarn. This reduces landfill and means no virgin fibre from non-renewable petroleum sources are used.

## lightweight

Made of durable, lightweight aluminium, the frame assists in cutting down on transport costs and fuel consumption. Aluminium can also be recycled at the end of the products working life.

# element<sup>♻️</sup>

A responsible approach to defining office space

A sustainable range, element™ will maximise your space but minimise your impact on the environment.

strong

A lightweight core constructed from 100% recycled cardboard, re-formed into a honeycomb pattern which gives tremendous strength and rigidity. An added benefit is that its lighter nature reduces transport costs resulting in greater fuel economy.

cleaner

All paint and glues used in its construction are water-based, resulting in less chemicals down the drain and a healthier workplace.

# Small changes matter. Choosing element™ makes a big difference.

It seems wherever you turn these days there's talk about the environment. You can hardly switch on the TV or radio without hearing about climate change, sustainable economics and what you can do to make a difference to the planet.

Business is facing complex economic and environmental expectations and challenges. But corporate social responsibility, carbon footprinting and sustainable development are more than just buzz words, they're the new drivers for tomorrow's business.

Buying greener products like element™ makes good business sense too. You won't only be reducing your carbon footprint, but creating a healthier staff environment and investing in quality craftsmanship that lasts.

element 

## Simple changes to the way we work

Screen Solutions have come up with a big idea for a big problem. Designed specifically to reduce the carbon footprint of your office, yet still incorporating cutting edge design, element™ is the innovation you've been waiting for.

As with all our products, element™ is designed and built to be versatile and develop with your needs. It is easy to install and re-configure and comes available as desk-mounted or floor-standing, allowing for considerable flexibility when planning a layout. There's no compromise in quality either, just because its kinder to the environment.

A range of accessory trays and pen pots is also available to help organise your vertical space, they simply slide into the top edge of the screen. The screen is fully pinnable for fixing papers and photos.

- ✓ 100% recycled material
- ✓ Minimum 50% recycled material

## Choosing responsibly

Careful consideration has gone into designing element™, from the sourcing of materials through to the processes used in its manufacture. It is the first in a line of exciting new 'green' products developed and manufactured by Screen Solutions under our re-live™ programme. Buying from the re-live™ range guarantees you are making an investment in high quality, sustainably produced office solutions, in turn creating a better environment for all.

As 'green' technology develops and our understanding of sustainability and the environment grows, so our design and manufacturing processes will evolve, and grow to meet those needs. We need to be sure we were producing products that have minimum impact on the environment. And we know you need that reassurance too.

With element™ you can make space to...

...inspire

...protect

...create

...organise

## How does using screens make a difference?

### Offices gain the following benefits when using screens.

- Screens are flexible space dividers and define a users' territory
- They create visual privacy thereby limiting visual distractions from the surrounding area. Various degrees of privacy are achievable depending on the height of the screen and amount of visual and audible communication required.
- Acoustically screens block noise by limiting sound waves travelling around open plan offices. This in turn creates a more comfortable acoustic environment giving better levels of privacy and intelligibility.
- Free-standing screens can be used to separate break-out spaces from work areas.
- On a larger scale, they create flexible departments within open plan offices, ranging from team areas through to individual office spaces
- They increase working area by making use of the '3rd dimension'. Basically this means items can be organised vertically on trays and holders attached to the screen.
